Skills

- JavaScript | Typescript | MongoDB | MySQL | PostgreSQL | React | Next.js | HTML5
- C-Sharp | .Net | MM4 | MM5
- CSS | Tailwind | StyledComponents
- RESTful APIs | Knex | Postman | Unit Testing | OOP | CI/CD | Deploy | Jest | Cypress | Robot Framework
- Backend | Frontend | Full-Stack | Kanban | Agile | Scrum | Notion | Git | Github
- Portuguese – Native Proficiency
- English – Full Professional Proficiency (B2+ in English Language by Eurocentres Cambridge, UK)
- Spanish – Limited Working Proficiency

Professional Experience

Software Development Intern	<u>Banrisul - Banco do Estado do Rio Grande do Sul</u>	Hybrid	09/2024 - Current
------------------------------------	---	--------	--------------------------

The Banco do Estado do Rio Grande do Sul S.A. (Banrisul) is a publicly traded company operating as a universal bank, active in various financial sectors, including credit, financing, investments, foreign exchange, and the management of cards and consortia. It also serves as an executor of the economic and financial policies of the State of Rio Grande do Sul, aligned with the State Government's plans.

- Develop, modify, code, and test computer programs based on a definition; assist in data analysis; perform hardware and software testing.

FullStack Developer	<u>Kukac Soluções Cognitivas</u>	Home Office	05/2022 - 09/2024
----------------------------	---	-------------	--------------------------

Kukac is a software house focused on developing solutions with artificial intelligence based on IBM Watson. I directly contributed to projects involving clients such as Emater of Minas Gerais and Abrasel (Brazilian Association of Bars and Restaurants) using Node.js for the backend, focusing on the development and maintenance of RESTful APIs. Additionally, I was involved in web projects using React and in the creation of mobile applications with React Native.

- Developed a complete REST API from scratch using Node.js with Typescript, utilizing a PostgreSQL database for a major client in the agricultural sector.
- Collaborated in the development of two mobile applications using React Native with Typescript, incorporating offline functions and push notification services using OneSignal.
- Developed a complete product search webpage using a crawler to collect information with React.
- Collaborated in the development of a web system for managing the sales and purchases of products and services in a marketplace model.

National and International Phraseology Monitor	<u>Pontifícia Universidade Católica do Rio Grande do Sul</u>	University	03/2018 - 12/2018
---	---	------------	--------------------------

- Coordinate and supervise students of the Aeronautical Sciences course.
- Assist the teacher in routine classroom tasks such as attendance control, task delegation and correction of evaluative activities

Education

System Analysis and Development	<u>Universidade do Vale do Rio dos Sinos</u>	EG. 2025.02
--	---	--------------------

- Associate Degree in System Analysis and Development

Web Full-Stack Bootcamp	<u>Labenu</u>	08/2021 - 02/2022
--------------------------------	----------------------	--------------------------

- Practical experience program in full stack web development guided by Agile Methods.
- Some of the skills learned during the bootcamp are HTML, CSS, Javascript, React, Styled-Components, React Hooks, REST, API Restful, HTTP, NodeJS, Knex, Typescript, MySQL, AWS, SQL, Git, GitHub, Firebase and Unit Testing with Jest.
